# FREE STANDING LARGE AWNING THAT CAN DO MORE

Nothing is better at adapting to your personal preferences than the new WINGLIGHT double sided jointed arm awning. This is because the WINGLIGHT comes in two versions, thus giving you complete freedom in your decision-making.

The main benefits at a glance:

- Shading for large, open spaces up to 49 m<sup>2</sup>
- Awning fabrics can extend and retract either in synch or asynchronously on both sides
- Weather-proof, dirt-repelling and light-fast fabrics
- Fabric and jointed arms perfectly protected by design

## WINGLIGHT COMPACT

Both awning fabrics extend and retract in synch on both sides

### Single-shaft system, one motor

System width max.:	5,500 mm
Max. projection on each side:	3,500 mm
Max. shaded area:	38.5 m <sup>2</sup>
Max. system height:	3,000 mm

### Optional: LED LIGHTING

**Three possible arrangements:** on the inside of the upright posts, on the outside of them or at all their four corners

## WINGLIGHT SOLID

Awning fabrics can also extend and retract asynchronously on both sides

### Double-shaft system, two motors

System width max.:	7,000 mm
Max. projection on each side:	3,500 mm
Max. shaded area:	49 m <sup>2</sup>
Max. system height:	3,250 mm

Option: lighting along the entire length of the support tube, other arrangements on request

## SUPPORT TUBE

For system widths > 5,500 to 7,000 mm standard, opens up many more possibilities such as attaching LED lighting and heaters.

Also available for system widths up to 5,500 mm as an option.

## INSTALLATION VARIANTS

Standard version with cantilever feet, can alternatively be fixed to the substrate with either two flanged plates or two ground sleeves

Standard version with flanged plates, can alternatively be fixed to the substrate with either cantilever feet or ground sleeves

### Ballast box:

This installation option creates a secure and stable base for the WINGLIGHT COMPACT and WINGLIGHT SOLID, without the need for complex and expensive foundation work.

## WALL BRACKET

Both WINGLIGHT versions are available with a wall bracket on one side.

## UPRIGHT POST PROFILE AND ELECTRICAL INSTALLATION

The load-bearing elements of the two WINGLIGHT versions are the two solid extruded aluminium upright post profiles, (160 x 80 mm). All neat and tidy: the electrical installations and any power packs required can be stored out of sight in the cavity inside the two upright post profiles.

Flanged plate

Cantilever foot

Ground sleeve

ballast box
